***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-14 are the inclusion of a full-width array printhead comprising a first printbar of a plurality of first die modules evenly spaced apart to have gaps and located on a top surface of a first substrate, a second printbar of a plurality of second modules evenly spaced apart to have gaps and located on a bottom surface of the first substrate, a third printbar of a plurality of third die modules evenly spaced on a top surface of a second substrate, and wherein each of the third die module is aligned with respect to the first modules such that each third module covers the gap between the first modules, and a fourth printbar of a plurality of fourth dies modules even spaced on a bottom surface of the second substrate, and wherein each of the fourth modules is aligned with respect to the second die modules such that each fourth module covers the gap between the second die modules. It is these limitations either alone or combined as claimed that have not been taught, found, or suggested by prior art.
- The primary reasons for allowance for claims 15-20 are the inclusion of the limitations of a non-buttable printhead comprising a set of printbars, each printbar comprises a row of nonbuttable die modules in alignment, the set of printbars including a total number of substrates Y equal to a total number of different colors X, wherein a first printbar of a first color is

located on top of a first substrate and a second printbar of a second color is located on bottom surface of the first substrate. It is these limitations either alone or combined as claimed that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
